

BENOMIC STAR PIPE RAIL TROLLEY

The BENOMIC STAR is equipped with the following as standard:

- 2x 24 V/110 AH full traction batteries
- The driving speed is infinitely adjustable from 0-60 m per minute
- Battery indication meter
- Simple lateral movement with one push of the button
- The driving control is electronically adjustable for comfortable acceleration and braking
- Simple control on the robust control panel
- On the chassis there's a switch to control the scissors going up and down
- Very strong and fast 0.37 kW driving motor
- The totally welded steel structure is indestructible
- Very stable hydraulic scissor-rack
- All powder-coated for many years of protection
- All pipe rail sizes can be supplied
- Always safe when going down due to hose breaking protection and emergency lowering valve
- Integrated tilt detection as standard
- Always provided with an original CE-declaration
- The scissors have a completely smooth finish and the head-ends are closed so that nothing hooks behind
- Robust and smooth finished chassis
- With several additional options available, please inquire about the possibilities
