

METO

AUTOMATIC SPRAY TROLLEY WITH DOSATRON

The Meto automatic spray trolley is a high quality spray trolley. In order to reduce the consumption of crop protection products the spray trolley is equipped with a Dosatron. The spray trolley is a 25 litre tank with an agitator fitted for the plant protection product. When spraying it is no longer necessary to fill the hopper with water and pesticide and to flush the hoses and pipes. The correct ratio of water and spray product is always available on the spray mast as the Dosatron mixes the pesticide directly with the clean water supply.

Benefits:

- No waste of expensive pesticide in the fixed spraying line or pump set
- No more flushing of the spraying line or reel
- Quick and easy to spray small areas
- Assurance of proper dosage of pesticide and water
- Middle tank equipped with floats for level monitoring

Technical specifications *
