

SPRAY TROLLEY WITH TANK

The spray trolley with tank has been designed for local plant protection or for use in small greenhouses. The trolley is equipped with a 200 l or 300 l tank and can be supplied with a spraying mast or gun. You will never again have hoses or a pump set positioned on a concrete aisle because the trolley is equipped with a tank and a pump. The spray trolley with tank can be supplied in various models such as: automatically operated, following the operator or manually operated.

Benefits:

- Excellent price/quality ratio
- Saves on labour costs
- Simple control and user-friendly
- No pump/hoses or spraying pipes in the greenhouse
- No unnecessary loss of media
