## Bio Hopper XL Crop waste handlingmachine

DIV0000106 Article code Selling type New **Brand** Weterings Type Bio Hopper 495 cm Length Width 175 cm Height 190 cm Weight 910 kg Capacity 7500 m2

## **Characteristics**

Min. height Max. height cm ✓ width: 1750 mm. ✓ length: 4945 mm. ✓ height: 1901 mm. (wheel axle in lowest ✓ rail size: 1000 mm. position) √ tire dimensions: 24.0×13.00-12 (2x) ✓ processing capacity (m²/u): 3000-7500 (depending on circumstances)

## More information about Bio Hopper XL Crop waste handlingmachine

"The Bio Hopper XL is an efficient machine for removing various horticultural materials such as rockwool, perlite, coir, slabs, tomato leaf, groundcover and various crops (cucumber, peppers, strawberries etc.) in a greenhouse. The Bio Hopper rolls up the canvas on which the material is drawn to the machine. The material falls on a conveyor belt, which transports it into a (bunker) container or on the concrete path. Instead of a containers, the material can also be driven out with a foliage fork.

Each Bio Hopper is ready-made for any particular type of tractor, wheel loader or forklift.

Specifications:

Max. length of transport mat: 160 m. Hydraulic pressure: 120-180 bar

Hydraulic flow:
