

STRING MACHINE

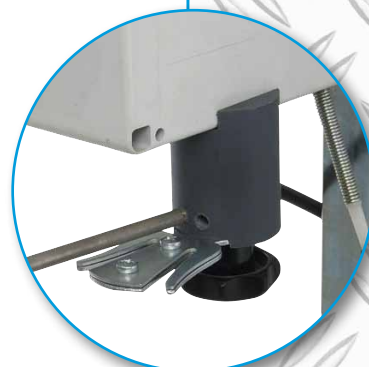

Save time, money and stress with the Steenks Service String machine. This company-made invention is developed at the working grounds and tested thoroughly. In combination with an electric pipe rail trolley cutting strings is now easier than ever!

Up to 1,500 strings an hour, every hour!

Get on your electric pipe rail trolley, set up the string machine and with just one push on the start button the string cutter will produce strings of equal length on any position you desire. Easy, fast and simple.

There are many reasons to choose for a Steenks Service string machine:

- Made in our own factory with only the best quality materials, maintenance free
- Suitable to work with in any indoor climate
- Fast, silent, accurate
- Sharp cutter made out of high quality steel
- Up to 1,500 string an hour in combination with your own pipe rail trolley
- All kinds of string / thickness is possible
- Machine standard delivered with 1 pole and 2 foot supports
- Clear instructions by Steenks Service employees who know what they are talking about
- When needed, Steenks Service has all spare parts in stock
