Save time, money and stress with the Steenks Service String machine. This company-made invention is developed at the working grounds and tested thoroughly. In combination with an electric pipe rail trolley cutting strings is now easier than ever!

Up to 2,000 strings an hour, every hour!

There are many reasons to choose for a Steenks Service string machine:

- Very quick and simple operation for switching- and cutoff mechanism
- Adjustable rotation-speed
- The direction in which the string comes out of the machine is easy to establish
- Made in our own factory with only the best quality materials. That's why it's maintenance free.
- Suitable to work with in any indoor climate
- Fast, silent, accurate
- Sharp cutter made out of high quality steel
- Up to 2,000 string an hour in combination with your own pipe rail trolley
- All kinds of string / thickness is possible
- Machine standard delivered with 1 pole and 2 foot supports
- Clear instructions by Steenks Service employees who know what they are talking about
- When needed, Steenks Service has all spare parts in stock
