

BULL ELECTRIC TRACTOR

User-friendly, durable and practical are the characteristics that make the Bull series electric tractors stand out from its peers. Thanks to the range of accessories, the Bull can be tailored to requirement.

Power on display

The Bull electric tractor can be used in any work environment where a quiet and powerful machine is required. Its full-traction battery gives it enough power to run for 24 hours straight. The battery is very easy to replace and the tractor is readily accessible for maintenance.

There are many reasons to choose Bull:

- Short turning radius
- Rear tow eye and hook for quick hooking up and unhooking of trailers, carts, etc.
- Customised structure suitable for use in rain and wind
- Made of steel and reinforced plastic for durability
- Display with battery indicator and hour counter
- Can be equipped with tyres of choice for driving on any surface
- Reliable hydraulic brakes and parking brake on rear wheels
- Standard headlights and rear lights
- Super light steering and silent performance
- The big chair guarantees comfort and vast back support
- Plenty of space for keeping small items and a clever cup holder
- Optional: rear loading platform for heavy loads
- Built-in high-frequency battery charger
