

# BETRAC AGV

## ELECTRIC TRACTOR

The BeTrac electric tractor is a highly effective addition to your internal transport system. Because of the low entry the tractor is manually easy to use as well. Off course, the electric tractors meet all CE directives and HSE legislation. The BeTrac electric tractor is environmentally friendly and quiet. With its compact design, the tractor is extremely manoeuvrable. It is the perfect solution to transport trolleys with your products. The BeTrac series can also be deployed unmanned, so harvesting trolleys can be unloaded at the right place and again unmanned drive back into the greenhouse.

### The BeTrac AGV electric tractor is equipped with the following as standard:

- With battery indicator and hour meter
- With traction battery 24 Volt 185 Ah
- With high frequency battery charger
- With solid non-marking wheels
- With mechanical brakes
- With 1.2 kW AC motor
- Turning radius: 250 cm
- Driving speed manual 10,5 km/h
- Driving speed AGV 3,6 km/h

### Technical specifications \*

#### Specifications
