

# SPIJKSTAAL 301

## ELECTRIC TRACTOR

The Spijkstaal 301 step model tow tractor is an outstanding example of the in-house towing of light loads over short distances on flat floors. Typical with regard to this transport type is the frequent setting-on and –off instances. The use of a step tractor with lowered step height proved to be less tiring and much more efficient. The 301 model is characterised by very high manoeuvrability, perfect ergonomics, fast acceleration, compact sizes and low weight.

### Benefits:

- Excellent price/quality ratio
- Saves on labour costs
- Simple control and user-friendly
- Low footboard
- Small turning radius

### Technical specifications\*

#### Properties

Towing capacity	1,000 to 1,500 kg
Step height	11 cm
Battery capacity-	24 V 165 to 345 AH
Electric motor brake	
Flipper control	
3 solid tyres	
Battery indication meter	
Backrest	
Can be supplied with the correct tow hook
