More information about Ground cover floor sweeper Stefix 135 HD

With the Stefix 135 HD including hydraulic high dump system you will have a perfect ride-on sweeper that is suitable for sweeping soft or uneven surfaces, such as greenhouse cultivation floors or outdoor cultivation areas. This machine is specially designed for growers who work on ground cover or foil. Because this machine has wide front and rear wheels and the front and rear axles have different widths, there will be no tracks on the ground and everything stays nice and flat. This machine is also suitable for sweeping fine dust.
